Repeat steps 1-6 for second Support Base.

Check distance between Gate Post faces. See 'Top Tip' above.

On level ground use the combined width of both gate leafs, plus 250mm.

Place two Ballast Blocks on Support Base (Use Lifting Clutch for ease of positioning).

Prepare Hinge eye bolts to receive Gate Leafs.

Slide Gate Leafs onto Hinge eye bolts.

Adjust all Hinges to bring Gate Leafs into position.

Insert Locking Plate to secure Gates.

Drill holes to receive Drop Bolts when gate closed and open. (Install Ground Tubes where appropriate).

Attach adjacent Polmil Mesh Panels to front face of Gate Post using M8x150 Coach Bolt Set.

or use optional Channel Connector for solid Hoarding.

Check all bolts, nuts and hinges are fully tightened.

Bolt on optional Cover Mesh to protect Hinge gap.

For outward opening Gates, cut mesh to clear Hinge.

Important Notice
It is the client’s responsibility to ensure that the installation is fully checked on a regular basis, particularly after high winds or severe weather conditions, paying particular attention to the security of fixings used within the installation.
